Budget is not comparable due to WAR, Budget will be revisited

Key Insights & Focus for next period

- Budget figures are not valid as they represent the previous agreed budget before war, however, its agreed with OG that budget will be revisited and changed
- War on Gaza continues to show its severe impacts on OP YTD Mobile revenues as shown when comparing to last year, however, in Apr Mobile revenues showed a significant increase due to Eid Seasonality.
- Wholesale revenue is higher than last month also as a result of Eid seasonality which positively impacted the international incoming traffic.
- Service Cost of Sale is on bar with last month as it had the same trend for incoming international off-net traffic.
- Service gross margin percentage is below comparing to last year due to the high transit traffic in April 2024, however if exclude transit, service gross margin will be 90% which is better than last year.
- Opex YTD is lower than budget due to controlling expenses mainly in Marketing and administrative, while it is higher than last year due to higher Fuel and bad debt expenses as a result of Gaza war.
- EBITDA YTD is higher than budget but lower than last year associated with lower gross margin and higher opex.

Key Insights

- While service revenue shows increase comparing to both budget and prior YTD, it is driven by the higher international incoming traffic (On-net and Off-net), which is correlated to the war situation.
- B2C and B2B revenue impacted significantly by current war, and it shows a significant decrease vs budget and same period last year as a direct effect of the continuous war on Gaza, and the political and economical situation in WB.
- Ooredoo app users also showed an enhancement comparing to first months of war, following Ramadan campaign in March and gift box campaign in April.
- Ooredoo is still leading the market in terms of Customer satisfaction measures, it is proven by the gap in NPS and CSAT vs. the competitor.

OP gross margin in Apr'24 MTD and YTD impacted by currency depreciation versus budget and same period last year. Excluding FX negative impact; Apr'24 YTD gross margin would have decreased by 1% compared to budget and increased by 2% versus same period last year.

Monthly Snapshot

- While the War was launched in Gaza, the West Bank has observed severe decline in Economy shown by the decline in GDP, Spending Power...etc. This severe hit to the economy is mainly driven by the cancellation of more than 150K labour permits by Israel in addition to further cuts on the Palestinian Government salaries. Since the West Bank is the bigger contributor to the revenue of OP, the decline in revenue there even by minor percentage points affects the overall revenue of the company.

Key focus areas for next Month

- Continue providing humanitarian free voice, data, and SMS bundle in Gaza
- Re-Launch the gamification campaign on the mobile app based on transaction
- Launch a roaming campaign targeting Hajj season
- Launch a CVM campaign targeting data churners to re-capture subscribers with an attractive offer
- Launch a focused CVM campaign on postpaid with a very attractive price and aggressive offers on top on the current bill.
- Launch WhatsApp always on campaign.

Market status

* Jawwal revenue is based on highly reliable and confident market intelligence

** Based on the Q3 2023 subscriber disclosed for Jawwal. As Jawwal didn't disclose base in Q4'23 and Q1'24.

8. Q&A

Mobile Prepaid - Overview

Prepaid Service Revenue (ILS Mn)

Customers Prepaid ('000)

ARPU Prepaid (ILS)

Gross Adds ('000)

30D vs. Daily avg Active Base ('000)

30D Recharging Customers ('000)

30D Churn (%)

30D vs. Daily avg VLR Base ('000)

Primary and Tertiary Recharges (Mn)

Key Insights & Initiatives

- Prepaid revenue in April showed a significant increase due to a high voice usage in Gaza following Eid Seasonality.
- Prepaid service revenue is higher than budget, worthy to mention that this increase is a result of an increase of International Incoming minutes.
- Prepaid ARPU is also enhanced, for previously mentioned reasons.

Mobile Postpaid – Overview

Postpaid Service Revenue (ILS Mn)

Customers Postpaid ('000)

ARPU Postpaid (ILS)

Gross Adds ('000)

30D vs. Daily avg Active Base ('000)

30D Churn (%)

30D vs. Daily avg VLR Base ('000)

Key Insights & Initiatives

- Postpaid consumer service revenue is 3% higher than last month however its 21.4% below budget following the War on Gaza.
- OP has recorded a provision for B2C Postpaid in Gaza due to minimal usage and the high collection risk.
- Postpaid ARPU is still enhancing month over month.

VOICE Usage Breakdown – Prepaid vs Postpaid

Key Insights & Initiatives

Voice Revenue (ILS Mn)

30D avg Voice Users ('000)

Voice ARPU (ILS)

Prep. 30D vs. Daily avg Voice Users ('000)

Voice Yield (ILS)

Voice Total Traffic (Min)

Prepaid Postpaid

Post. 30d vs. Daily avg Voice Users ('000)

Voice Usage MOU/User (Min)

- Voice revenue increased in April vs. last months, as mainly a result of Gaza high Prepaid acquisition and usage.
- Ooredoo has been providing a humanitarian support for Gaza prepaid customers consist of free minutes renewed monthly since the war started, as a result voice users and voice traffic increased.

DATA Usage Breakdown - Prepaid vs Postpaid vs Data only

Postpaid Prepaid
Data only

Data Revenue (ILS Mn)

30D avg. Data Users ('000)

Data ARPU (ILS)

Prepaid 30D vs. Daily avg Data Users ('000)

Postpaid 30D vs. Daily avg Data Users ('000)

Data only 30D vs. Daily avg Data Users ('000)

Data Yield (ILS/GB)

Data Usage GB/User (GB)

Total Data Traffic

Key Insights & Initiatives

- Data revenue is also increased in April vs. last month due to Eid seasonality.
- 30 Days average Data users has shown an increase in the war period comparing to last months (before war), however this is a result of free data (2G data) granted for Gaza's subscribers with noncommercial impact.
- Not only free traffic increased in Gaza, but also Gaza's customers have purchased 2G data bundles as a result of WiFi outage following the electricity cuts.
- In WB, it's worth to mention that following the salary cuts and prohibiting people to travel between cities, it showed a drop in customer purchasing power which impacted the data usage per customer.

App users

Recharge & Pack Purchases of App Users

Churn & ARPU of app users

Key Insights & Initiatives

- MAUs in March is the highest comparing to Q1-24 and Q4-23 period, as a result of Ramadan Campaign. However, in April OP launched a new App campaign to encourage users to make money transactions through the app, which resulted in increase the pack purchase users.

Definitions

Count of Total B2B Trouble Tickets: Trouble Tickets to include Requests and complaints

Number of Unique accounts raising a TT: If an account raising multiple TTs, to be counted as 1 for this KPI

B2B Fixed Line installation TATs: from time of receipt of purchase order, until customer acceptance certificate receipt

Key Insights & Initiatives

- Total B2B trouble tickets volume decreased because of:
 - ✓ War on Gaza.
 - ✓ New enhancements which was implemented by customer resolutions team mainly mapping all billing system notifications to be viewable for all front liners on CRM system, by having this access agents will be able to answer most of customer inquiries related to his payments, bundles renewals.
 - ✓ During Q4 there were no activities or changes that affecting B2B segment total trouble tickets comparing to other Qs.

Key Insights & Initiatives

Ongoing increase in inbound voice is still going due to war on Gaza since October 7th. This caused a spike in revenue, setting it over budget, vs previous quarter and previous year.

Roaming revenue is continuing its drop inbound due to the geopolitical situation. Outbound the budget was achieved and covered during March through a major campaign to capture Umrah travellers.

Outgoing International Voice Revenue overachieved budget due to increase in traffic, despite global decline trend and pushed by higher calls internationally starting October 7th and the ongoing war.

Outgoing International Cost are above budget and vs MoM due to the high traffic of calls coinciding with the political situation on the ground, besides there is a slight increase cost to worldwide destinations.

Digital Services & Partnerships – Overview

Net Revenue, ILS '000

Customers / Accounts / Traffic* (#)

Complaints (# and % of total)

Key Insights & Initiatives

- OP intended to pause all push and commercial activities regarding VAS and digital services following the political situation, however, Feb showed an increase in both B2C and B2B2C revenues comparing to previous months, worthy to mention that the drop in January revenue is mainly due to a retro-adjustment done in January for an incident took a place in December.

8. Q&A

Service Availability & Major Incidents

Explain degradations/changes in availability trend, root cause and actions for improvement.

Describe major networks or IT outages/Incidents causing services disruptions, complaints or degradations in Voice/Data CSAT (if any)

Availability 2G / 3G

- NW Availability are running in same trend in terms of 3G NW, while we still have degradation on 2G NW availability due to war in Gaza. Also the site on grid has been less than previous months due to War and cut off electricity on Gaza, regarding the enhancement over Site Power Availability ON Grid Sites we applied the new criteria requested by OGT team, also regarding Power Availability Off Grid Sites it appears very low since we concluded Gaza as off grid sites since there's no electricity due to Gaza war.

Incidents:

- Gaza War.

NW & IT projects execution

Describe RAN, Tx, Fiber and IT projects rollout progress (explain delays/challenges versus plan or ahead of plans) and Impact in Tech Capex/Tech Opex versus budgets.

RAN Projects:

- We have 726 site operational in WB up to date . (Gaza numbers will be updated after the war is over.)
- Most of last year Expansion project remaining equipment is delivered to our warehouse, and we resumed the expansion project. This year expansion project materials are delivered to port. They are waiting for customs clearance.

Tx, FIBER NW and/or FTTX/FWA Projects:

- All section in the Backbone were defined & surveyed.
- All parts are waiting for the Israeli approval.
- One section is approved and implemented – Salem project 12.5 KM.
- Tarqumia section is ready for implementation with approved contingency budget .
- Tulkarem and Bethlehem cross point sections are approved.

CORE & IT/Digitalization Projects:

- MSCs SWAP: 90% of project completed.
- APIGEE Project: Running Smooth in line with OG Guidelines.
- Gold (charging and billing) Upgrade: Some systems components were deployed to production environment. Last migration dry-run were executed and all open issues were re-tested and passed, we are planning to start the environment cleanup activities and final regression testing to plan for the subscribers' migration phase.
- MPBN SWAP: : hardware cleared from customs , we kicked off the project again in Med1 and Rosh sites. Currently we are in the physical installation phase of Med1 Routers.
- IT Backup SWAP : Cisco will provide 2 NetApp storages free of charge to cover file-based backup with 5 years retention. This compensation has been accepted by OP. Now, we are finalizing the amendment for signature.

TECH CAPEX:

- Delay in Sites clearance impacted the installations timeline and HW spending, which is in total impacted the YTD spending for this project.
- Delay in MBPN Delivery to the site (New customs process that delaying HW clearance), that impacted YTD actual.

TECH OPEX:

- NW OPEX: OP achieved a good savings in Ericsson system support renewal, in addition to other OPEX delays due to sites implementation delay.
- Almost in line at CME OPEX, while we had increase in the fuel expenses due to GAZA genocide situation.
- IT OPEX: main Variances Due to delays in some project such as the delay in Campaign Manager, ESS project, and savings in some system support contracts renewal. However, we are expecting increase in some IT support contracts that subject to renewal.

Lead Technology KPIs: Executive Summary (2/2)

Traffic trends:

Explain changes in Voice traffic and Data volume trends (% growth/decrement and reasons), tendencies per technology and seasonality effects

Voice:

- We still have increment in Voice traffic compared with normal trend after new policy applied in Gaza, Since Total Traffic was 199,357,275.2 at Mar 2024, while it 184,940,599.7 at Apr 2024).
- We have 62.99% of traffic over 2G NW and 37.01% over 3G NW, since as OP offered free bundles in Gaza strip due to war as a Social responsibility towards our subscribers in Gaza, also we increased the life cycle of new lines since the new lines were deactivated after one month without charging, but since there very tough conditions in GAZA we changed this strategy.

Data:

- 3G Data Traffic are running smoothly as per the yearly trend, while we have increment in 2G traffic due to free bundles in Gaza.
- We have 99.23% of traffic over 3G NW and 0.77% over 2G NW. Optimization team have the capability to distribute the traffic between technologies as needed, except for GAZA since OP has only 2G NW.
- Regarding the Actual monthly volume, we started calculating the data from NW side as per OGT recommended, which will have slight difference from commercial side.

Voice Performance

Describe degradations/changes in voice performance (Accessibility, Congestion, Drop, audio quality)

2G:

- Enhancement notice on main 2G KPIs since we have some sites in Gaza are live now, while in WB regions KPIs are running normally.

3G:

- No major variance in 3G voice KPIs.

VOLTE:

- No 4G services in OP

Data Performance

Describe degradations/changes in Data performance (Accessibility, Congestion, Drop, Tutela ECQ/CCQ)

4G (for the case of OP, its for 3G):

- Tutela Readings are getting better especially in terms of DL throughput, since we exceeded our competitor OP 6.67 and for JAWWAL 6.50.
- Gap with our competitor increased in terms of uplink throughput since OP was 4.03 and JAWWAL 3.45.

5G:

- N/A

Key Insights & Initiatives

- Domestic Interconnect cost is lower than last year following the decrease in outgoing off-net traffic and lower cost per minute following MTIT rules in Oct'23, however its higher than last month following the Eid seasonality.
- International Interconnect total cost is higher than last month impacted by the increase of International outgoing calling generated from Gaza subscribers and Eid seasonality.
- Equipment cost is lower than last month due to lower equipment sale

Key Insights & Initiatives

- Opex is lower than budget due to controlling expenses mainly in Marketing and administrative, in addition to IT ESS cost delay, while it is higher than last year due to higher Fuel and bad debt expenses as a result of Gaza war.
- Network OPEX is over budget and previous year due to increase of sites fuel expense coming from the current war in Gaza.
- IT OPEX YTD is lower than budget driven by the delay of implementation of ESS project while it is higher than last year due to new IT system support contracts.
- Billing and collection expense is higher YoY and budget resulting from incurring additional bad debt expense as a consequence of the current war in Gaza.

CapEx Status YTD - [Apr'24]

Commitment

Spent

Capitalized

Comments:

- CAPEX spent is lower than budget by \$0.8m mainly related to 2024 sites equipment which is still under Israeli side clearance. While the commitment gap is mainly related to \$2.2m core swap which is now shifted to full NOKIA swap that is in progress. As for the capitalization, it has a gap due to lower CAPEX spent and the projects in CIP are still not ready for use.

Strategic Programs and Project Updates

Key Updates:

- **Project 1: CX**

- Frontline Empowerment: finalized the Initiate phase and will start the Identify phase after OG agreed OP proposal.
- Customer Journey improvement: Finalized the define phase for top 3 customer journeys, and got OG approval on our proposal, now we are in design phase (redesign or design new customer journeys based on customer expectations)
- Contact center efficiency: We are in the phase of defining the initiatives that flows into better contact center efficiencies.

- **Project 2 : Data Management**

Risks and Opportunities :

- Risks:

- Not meet the significant OSAT enhancement.

- Opportunities:

- Achieve high satisfaction scores.
- Empower frontline agents through enhancing three major key drivers which affects directly customer experience: Agent helpfulness, Agent knowledge, understanding customer enquiry.

- Risk: The project not started yet and the requirements are under assessment

Start Date	Planned Completion %	Status Justification
1 st January 2024		1. Frontline Empowerment: OP finalized <u>Initiate phase</u> through exploring & analyzing employee feedback & internal data, after that OP will submit proposal for OG CX team to discuss & feedback. 2. Customer Journey Improvement: OP finalized <u>Define phase</u> through exploring & identifying customer pain points of customer specific journeys and submitted our proposal to OG CX team & got the final approval. 3. Contact Center Efficiency:
End Date	Actual Completion %	
31 st December 2024		

Objectives/Business Benefit	Milestones	Issues and Risks
1. Frontline Empowerment: Empower and Enable our frontliners staff to achieve higher Employee and Customer Experience satisfaction scores 2. Customer Journey Improvement: To better understanding of customer needs, expectations and emotions. Help drive overall customer centric agenda. Analyze customer pain points. 3. Contact Center Efficiency: Propose initiatives that flows into better efficiencies.	Initiate, identify & implement	<ul style="list-style-type: none">Changes in Seibel system will not implement in agreed timeline.Can't achieve the significant enhancement in customer experience project.Can't achieve high satisfaction scores in specific touchpoints (Call center & Mobile App).

Data Management

Start Date	Planned Completion %	Status Justification
Not Started	0%	<p>In the Data Management program, we have two main projects; Data Science, and Data Governance. Both projects' scopes have not been defined yet. The most recent update about the Data Governance project, is that in OP we are waiting the project owner to be identified (Data Governance Owner), which is still pending.</p> <p>In Addition, the most recent update about the Data Science project is that OP is currently in the hiring process of a new Data Science Engineer, and the requirements will begin to be gathered afterwards.</p>
End Date	Actual Completion %	
Not Applicable	0%
